

TURNING

Turning is one of the most popular methods of metalworking. We implement this process comprehensively on modern lathes, enabling CNC turning, conventional turning, shape turning, grooving, drilling, cutting and threading. We guarantee the high quality of processed details also through the experience of our operators.

Machine	Maximum turning diameter	Maximum turning length [mm]	Material
DMG CTX BETA 2000	Ø 600	2000	Steel / cast iron / non-ferrous metals
DMG CTX 510 eco V1	Ø 465	1000	Steel / cast iron / non-ferrous metals
Nakamura Tome SC 300 II	Ø 360	600	Steel / cast iron / non-ferrous metals
Conventional lathe	Ø 630	1500	Steel / cast iron / non-ferrous metals
